Job Submission

### User Machine

```
est = Estimator(source_directory='scripts',  
                script_params=script_params,  
                compute_target=compute_target,  
                entry_script='train.py',  
                environment_definition=rc.environment)  
run = experiment.submit(config=est)
```

- Submit job using Python script/Jupyter
- Scripts in the source directory will be uploaded
